

Polyurethane Conveyor Skirting

Prevent spillage and conveyor abrasion with Australian made polyurethane conveyor skirting

Skirting contains or controls product at the transfer point on belt conveyors. It maintains a dust seal between the chute and the conveyor belt.

This not only reduces WHS risks and costs in time and money associated with spillage and dust, skirting improves conveyor stability and reliability.

Traditionally, skirting is made from rubber. But polyurethane skirting lasts four times longer than rubber skirting.

Brain are the experts in polyurethane industrial products. We can vary the polyurethane in terms of its hardness, elongation, tensile, and abrasion resistance.

Brain's poly skirting is available off the shelf in 15 metre lengths or custom made to your requirements.

For any conveyor, anywhere

Brain's polyurethane conveyor skirting can be used in these industries.

- ✓ Mining – underground and open cut
- ✓ Quarrying
- ✓ Other extractive industries
- ✓ Recycling and construction aggregate materials sites
- ✓ Timber, pulp and paper mills
- ✓ Grain handling
- ✓ Other bulk materials handling sites.

Benefits of Polyurethane

- ✓ Long lasting
- ✓ Fire safety
- ✓ Flexibility - moulds endlessly
- ✓ Efficient, cost effective and sustainable - change outs do not need to occur as often.

Why Brain for Poly Skirting?

- ✓ Australian made
- ✓ Australian owned company
- ✓ Premium polyurethane from Australia's largest supplier of high performance prepolymers
- ✓ In house polyurethane ovens for quicker turnaround
- ✓ Choice of colours.
