Tungsten Carbide Tips

A clean conveyor belt is essential to protect one of your most expensive assets. And Brain's Tungsten Carbide Tips maximise the service life of your conveyor belt cleaners.

THE COSTLY PROBLEM OF MATERIAL FINES CLINGING TO YOUR CONVEYOR BELT

Often material fines cling to the conveyor belt past the unloading point. The residual material is carried back on the return side of the conveyor, eventually discharging at various points along the conveyor belt, presenting hazards to personnel and plant efficiency.

A conveyor belt cleaner is an accessory used to remove material adhering to the return side of the belt.

Brain's Tungsten Carbide Tips remove any residual fine material on the conveyor belt after load discharge.

The best way to maximise the service life of your conveyor belt cleaner is to use Brain Tungsten Carbide Tips.

USES

Our Tips are designed for H, P and T belt cleaners used on sliced belts with good belt cover. If you have belts with running mechanical fasteners talk to us about alternative solutions.

PURE GENIUS TUNGSTEN CARBIDE TIPS FROM BRAIN

- » Brain's Tungsten Carbide Tips provide high levels of resistance to abrasion and maximum resistance to carbide corrosion in environments with high acid or salt
- » The tips and fasteners are completely stainless steel
- » Unlike painted or plated mild steel tips, Brain's stainless steel tip bodies will not corrode which helps with site maintenance

OTHER BELT CLEANING PRODUCTS

Brain's Mounting Cushions.
