

VISYLOAD

The **SAFEST** load tension indicating washer in Australia.

WHAT IS VISYLOAD?

VISYLOAD is an easy to install, Australian-made, load-sensing washer that fits a rock bolt, other bolt or threaded anchor.

The VISYLOAD washer is a NATA Accredited component that lets the user know, at a glance, the working load limit on a rock bolt or threaded anchor. It provides an easy, quick reference way to reliably trust if it is safe to suspend a load from a rock bolt or a threaded anchor.

SAFETY IS PARAMOUNT

VISYLOAD has been designed and manufactured to achieve the **highest safety standards**. Every VISYLOAD product is manufactured using heat certified raw materials under a strict ISO9001 accredited quality system.

VISYLOAD has been performance tested and accredited in a NATA certified laboratory, and **every single product is tested and batch tested during manufacture to ensure safety and reliability**.

HOW DOES IT WORK?

Simply tighten the nut and it will lock into place. When the VISYLOAD tabs are fully deployed, they curl downwards, giving you a visual indicator that the applied tension or torque is correct and confirms that it is at its safe working load limit.

MODELS AND FEATURES

VISYLOAD comes in different models for different weights.

6 tab = 8 tonnes

4 tab = 6 tonnes

3 tab = 3 tonnes

BENEFITS OF VISYLOAD

- ⚙️ Ensure the safety of your workers - **SAFETY IS PARAMOUNT!**
- ⚙️ Reduced injuries and risk of injuries.
- ⚙️ Saves time and money - No need to wait for an expensive Geotechnician to assess.
- ⚙️ No downtime for staff.
- ⚙️ Cost effective.
- ⚙️ Easy to install.

WHO USES VISYLOAD?

VISYLOAD can be used by any competent person to verify the correct bolt pull out strength.

It can be used in a range of industries including:

- ⚙️ Mining
- ⚙️ Tunnel builders and tunnel operators
- ⚙️ Oil & Gas
- ⚙️ Municipal and Marine

In underground mines, it is mandatory for each rock bolt to be assessed and certified. VISYLOAD streamlines this assessment process.
